a sixty second guide

Aluminium *or* PVC?

How to choose your window frame.

both hold glass

It comes down to *the frame*.

The difference is the material around the glass.

Aluminium

STRONG · SLIM

PVC

WARM · COST EFFICIENT

Everything else follows from that.

ii. aluminium

when it wins

Choose aluminium *when...*

-
- i* You want slim sightlines and more glass.
 - ii* The opening is large or structural.
 - iii* The look is modern and design led.
-

15/16 in

SIGHTLINE · SLIMPATIO 68

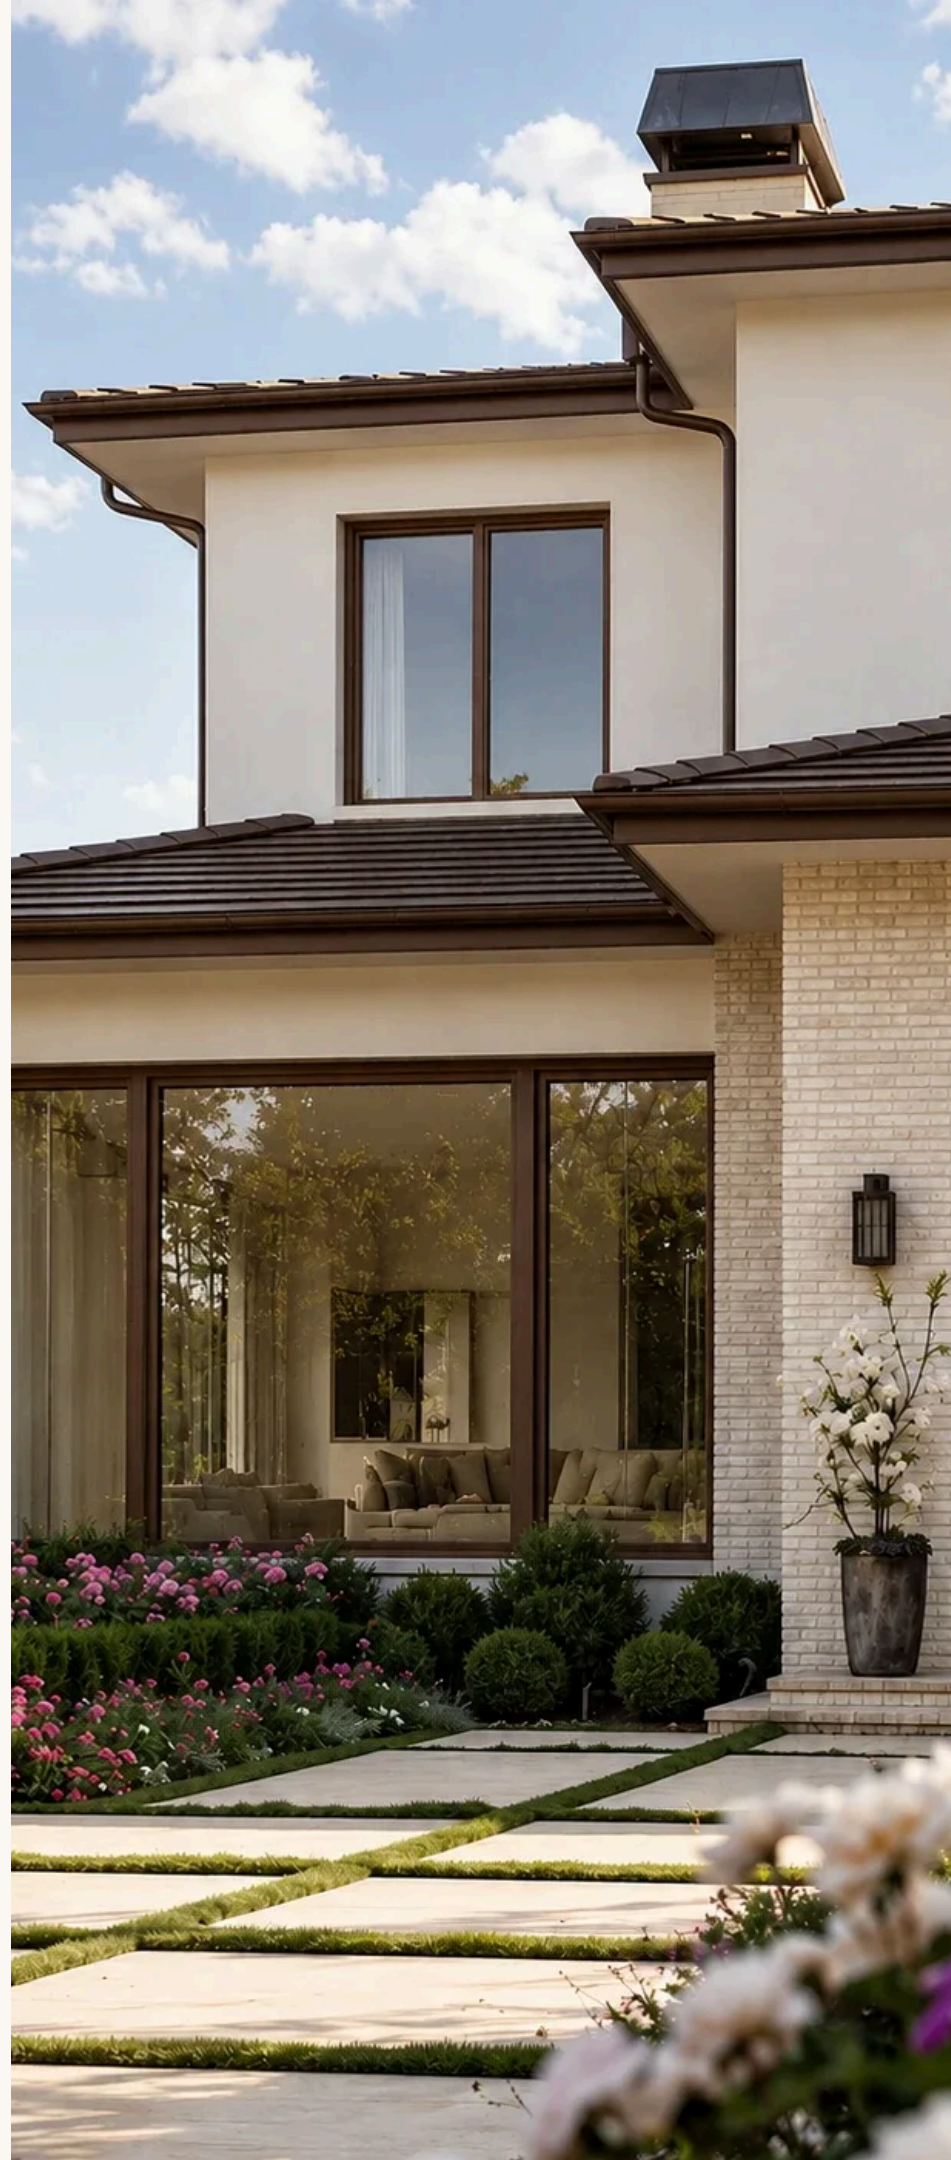

iii. pvc

when it wins

Choose PVC *when...*

- i* Thermal performance is the priority.
- ii* The budget needs to work harder.
- iii* Low maintenance matters most.

*Warm, efficient and easy
to live with.*

still unsure?

Start with *the opening*.

Large spans and slim frames point to aluminium. Energy and value point to PVC. Size and sightline decide it.

What are you specifying, and why? Tell us in the comments.
