VALDA

One window, two ways to open.

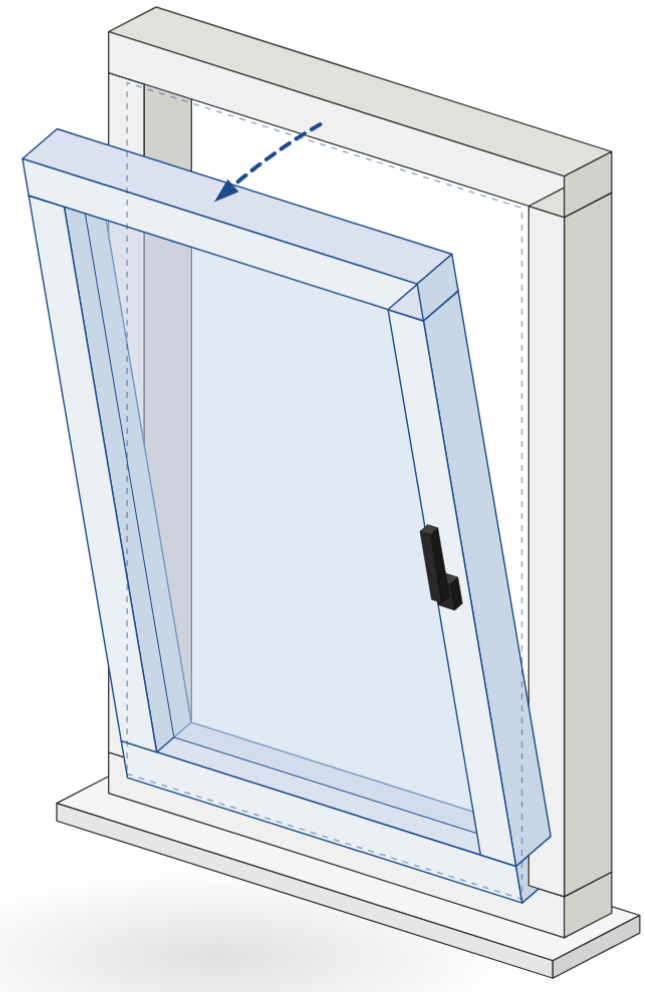

System

Tilt and turn · MasterLine 8 · Reynaers

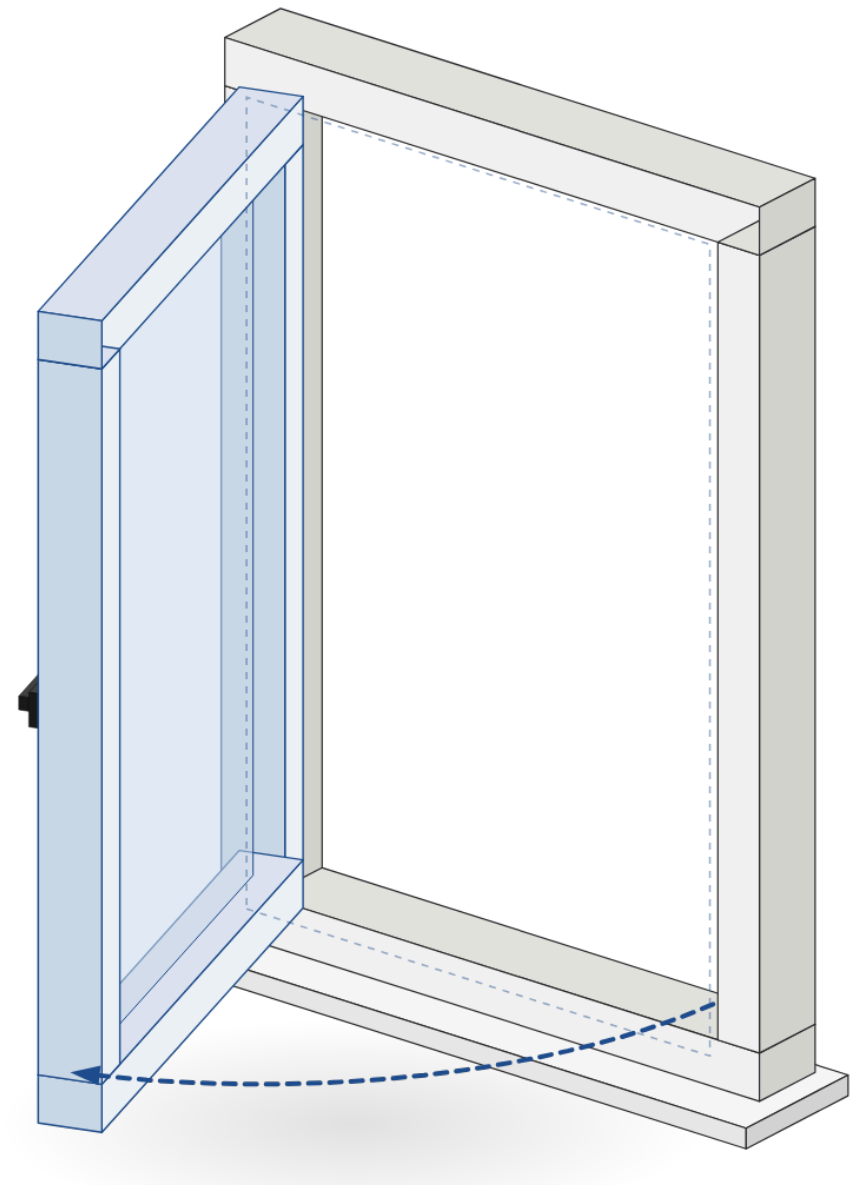

Tilt: fresh air, even in the rain.

Handle up. The top of the sash leans into the room, so air comes in while the window stays secure.

Turn: open it like a door.

Handle sideways. The whole sash swings into the room, so you can clean the outside glass from inside.

How it works

One handle, three positions.

/01 **Down: closed**

Multi-point locking pulls the sash tight against the gaskets.

/02 **Sideways: turn**

The sash swings fully open, like a door.

/03 **Up: tilt**

The top of the sash leans in for secure ventilation.

MasterLine 8 · acoustic

STC 50

MasterLine 8

Six products, one impact rated range.

Fixed, tilt and turn, casement, awning, entrance and terrace doors. Large and small missile rated for Wind Zone 3.

Tilt and turn or casement? Which do you prefer, and why?
