VALDA

BEFORE YOU ORDER

BEFORE YOU ORDER EUROPEAN WINDOWS

Five things to *check.*

SWIPE →

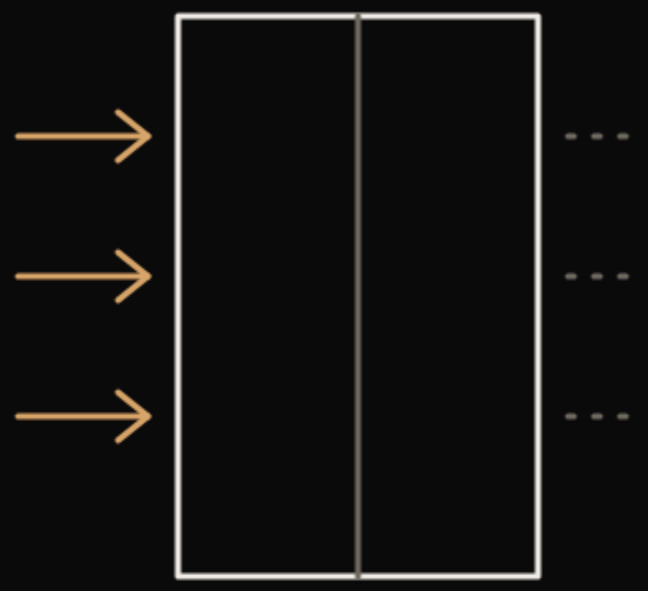

01

The approval for your zone.

On the hurricane coast, check the impact rating and design pressure for your exact wind zone and window size.

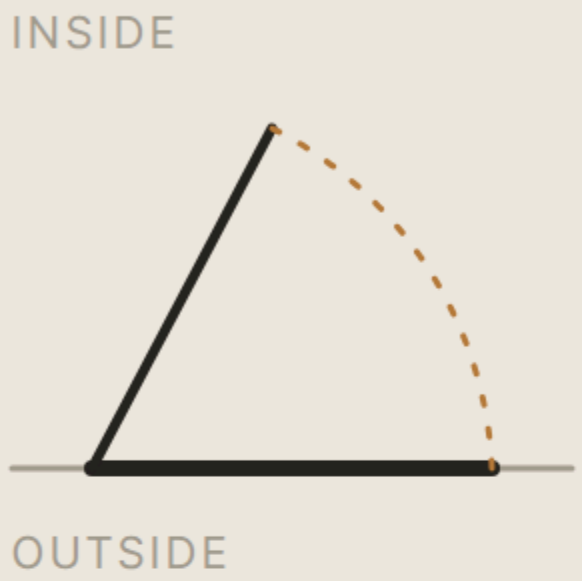

02

The U-factor for your climate.

Compare whole-window figures, frame and glass together, against your energy code.

03

The opening direction.

Inswing windows need clear space inside and a screen on the outside. Outswing is the reverse.

04

The lead time.

Production plus the Atlantic crossing. Plan it into your schedule from the start.

05

Who handles customs and delivery.

Know who clears the windows at the port and who brings them to site.

Send us your openings. We will check all *five* for you.
