01 THE LOGO

Protect, provide, see through.

The VALDA mark is two open hands sheltering a four-pane window. It says what we do in one picture: we make the windows, doors and facades that protect a building and the people inside it. The logo is a single piece of artwork. Always use the supplied files. Never redraw it, retype the wordmark, or rebuild it from parts.

Four lockups, three colourways

Primary

Favicons, social avatars, small spaces

VALDA

Wordmark

When the icon is already present

Each lockup comes in Colour (blue icon, ink wordmark), Black and White. Use Colour on white or light backgrounds, White on photography and dark backgrounds, Black for single-colour print, stamping and fax.

03 CLEAR SPACE AND MINIMUM SIZE

Give it room.

Keep a clear zone around the logo equal to the height of one window pane in the icon (x). No text, edges or other graphics inside it.

Minimum sizes

Stacked logo: 20 mm / 80 px wide

Horizontal lockup: 30 mm / 120 px wide

Icon: 6 mm / 24 px wide (16 px for favicons)

Always enough contrast.

Colour on white

Black on paper

White on ink

White on blue

On photography, place the white logo over a calm, dark area of the image (sky, shadow, glass), or add a subtle dark gradient behind it, as on the 2026 catalogue cover.

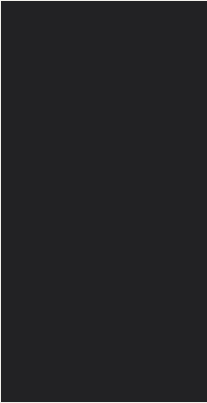

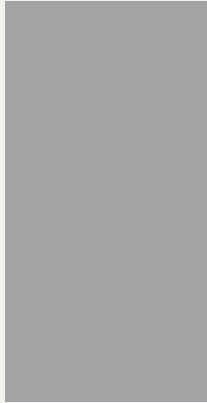

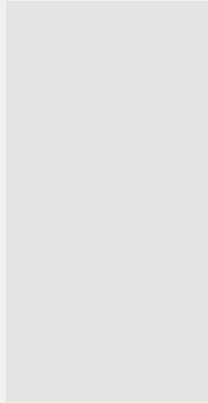

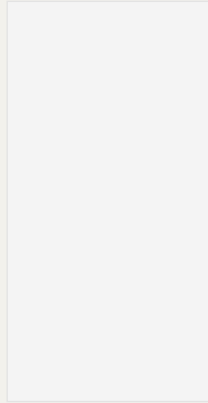

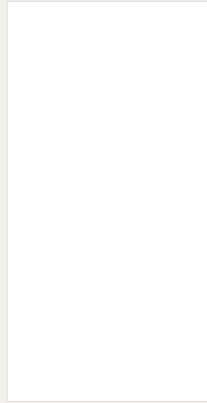

Don't change the logo.

- ✗ Stretch or squash it
- ✗ Recolour it outside the palette
- ✗ Rotate it
- ✗ Add shadows, outlines or effects
- ✗ Place it on busy images
- ✗ Retype or rearrange the wordmark

If a layout seems to need one of these, use a different lockup or colourway instead.

Ink, paper and a little blue.

VALDA is mostly monochrome: ink on white or warm paper, with generous white space. Blue is an accent for links and small highlights, never a large background on the website.

Light headlines, quiet body.

See through our eyes.

HEADLINE · INTER LIGHT · SENTENCE CASE

ENGINEERED IN EUROPE

EYEBROW · INTER SEMIBOLD · CAPS, WIDE TRACKING · BLUE

Two decades of craftsmanship meet cutting-edge engineering to deliver windows, doors and facade systems that are precise, certified and built to perform.

BODY · INTER REGULAR · SLATE GREY

Website: Inter Tight.

Print and documents: Inter.

Office fallback: Arial.

Headlines are large and light, never bold. Use sentence case. Keep lines short and leave space around them.

Real buildings, real light.

Architecture photographed in natural light, with clean lines and calm skies. Show finished buildings, profile details and our factories and people. Avoid busy stock photos, heavy filters and staged smiles.

Plain, precise, confident.

Plain

Short sentences. Say what we make, where we make it, and what it is certified for.

Precise

Real numbers: U-values, FL approval numbers, lead times. No vague superlatives.

Confident

A family manufacturer since 1998 with three factories. We state it, we don't shout it.

Client first

Start from the client's project: you send a drawing, we engineer, manufacture, certify, ship.

Which file do I send?

01-Logo / SVG	Website, digital, Figma, Canva
01-Logo / EPS, PDF	Printers, sign makers, Illustrator (open the PDF or EPS in Illustrator)
01-Logo / PNG	Word, PowerPoint, email, social media (transparent background)
01-Logo / Favicon	Browser tab icon and app icons
02-Colours-and-Fonts	Colour codes (HEX, RGB, CMYK, Pantone) and the font files
03-Catalogue	2026 product catalogue and technical catalogue (PDF)
04-Brand-Guidelines	This document
05-Video	Factory film (1080p and 720p) and the short website loop (MP4)
